**Dear Hiring Manager,**

I am Sufyan Arain, a dedicated graphic designer, web developer, and entrepreneur currently pursuing a Bachelor's degree in Computer Science Engineering at Quest Nawabshah. As the founder and CEO of 3DVission Hub, I specialize in delivering cutting-edge solutions in graphic design, web development, and digital marketing. My commitment to fostering innovation and skill development extends to my role as the founder and President of Skills Development Society (SDS) Quest, where I empower students through courses, seminars, and webinars in technology and design. Additionally, I serve as a student representative for SCB at Quest Nawabshah University, advocating for student interests and fostering community engagement.

With over 3 years of industry experience, I have established myself as a proficient graphic designer at HighTech Software House, Nawabshah, where I lead design projects and mentor interns, nurturing their graphic design skills. I also conducted two comprehensive graphic design courses—one under ORIC Quest and another at HighTech Software House—equipping participants with proficiency in Adobe Creative Suite tools and design principles.

During my internship at USPCASW MUET, Jamshoro, I honed my expertise in web development, gaining hands-on experience in both front-end and back-end technologies.

**Best regards**

**Sufyan Arain**
